

REACH

1. EC-Regulation N0. 1907/2006 (REACH)

Reach (Registration, Evaluation, Authorisation and Restriction of Chemicals) applies to manufacturers and importers of substances with more than 1t/a.

REACH applies not to preparations and products.

Substances:

Chemical elements and their compounds in natural state (including additives for their stability and impurities caused by the used processes).

Preparations:

Mixture, composite or solutions, which consist from two or more substances.

Products:

Articles, which receive through production a particular form, surface or shape, which affect mainly their function than their chemical configuration.

Manufacturer and **Importers** are responsible for registration, i.e. substances have to be registered.

Distributors and **Downstream user** are exempted from registration.

Manufacturers:

Natural and legal person registered in the EU and manufacturer of a substance in the EU.

Importer:

Responsible for the importation of substances into the customs area of the EU.

Distributor:

Simply stores a substance or preparation and places into circulation to third parties, this applies to retailer respectively.

Downstream User:

Uses a substance as it is or in a preparation within its industrial and commercial activity.

Exemption: Distributors and importers.

Note:

It is not required that manufacturers of products have to confirm the registration of substances.

Material declarations are not part of the REACH-Regulation.
