

Design cables and fiber optic patch panels online for greater speed and simplicity

SELECT CONFIGURATOR

STEP 1: SELECT CONFIGURATOR

Make the appropriate selection from four configurators:

- Fiber optic patch panels
- Ready-to-install fiber optic links
- Fiber optic patch cords and pigtails with IP class
- RJ45 patch cords with IP class

DEFINE PRODUCT

STEP 2: DEFINE PRODUCT

Configure cable with connectors or fiber optic patch panels together with accessories. A simple and user-friendly menu guides you swiftly to the product you require.

SHOW FINAL PRODUCT

STEP 3: SHOW FINAL PRODUCT

View itemised list of configured products, check details and place in shopping basket. The itemised lists can be downloaded in PDF format including all the technical data and prices.

SHOPPING BASKET

STEP 4 : SHOPPING BASKET

View configured products in shopping basket. Change order quantity, order similar products in different lengths, or delete products.

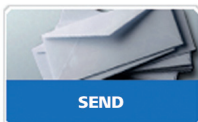

ENTER ADDRESS

STEP 5: ENTER ADDRESS

Telegärtner distributors: are required to enter their distributor number, name and email address, then send inquiry. Forgotten your distributor number? No problem - just enter your firm, street and town as well and we can identify you.

End customers: are required to enter their address data and select a local Telegärtner distributor.

SEND

STEP 6: SEND

The products you have configured are saved as inquiries with an individual TICNET configuration number for subsequent order. You can quote this number to order your products from us. This number and the security code are sent to you in an email.

TICNET is:

... simple

The TICNET configurator is available around the clock:
www.telegaertner.com/ticnet

... fast

The user interface is so clear and easy to follow that even complex combinations can be assembled in just a few clicks with the TICNET configurator.

... user-friendly

Whether you are a distributor or an end customer, the TICNET configurator provides the information and options you require for your work.

2	L08021K1204	FO Indoor Cable, Breakout 1x(GN)H4, 4G50/12 loose buffered fibre	2,62 €	5,24 €	LWL
			Subtotal: 44,00 €		
			Total 44,00 €*		

* List prices excl. VAT, Postage/Packaging

Configuration memory

All the cable links and fiber optic patch panels which you have developed in the TICNET configurator are saved in a shopping basket, allowing you to view your configurations at any time or use them for subsequent orders.

Configuration request facility

You can view the products you have configured at any time by entering your TICNET configuration number and security code on the TICNET homepage. The number and security code are sent to you in an email.
